PROFESSIONAL SUMMARY

Data analyst with nearly four years across product and market insights, reporting, and product analytics. An MBA in Marketing and Business Analytics on the commercial side, and a Master of Data Science in progress at Swinburne on the technical side. Day to day work in SQL, Python, R, Tableau, and Power BI, with a focus on clean assumptions, reproducible analysis, and dashboards that drive decisions.

TECHNICAL SKILLS

Languages and querying: SQL, Python (pandas, NumPy, scikit-learn), R

Visualisation and BI: Tableau, Power BI, Looker Studio, Excel, matplotlib, seaborn

Analytics: Statistical analysis, A/B testing, regression, clustering, forecasting, Google Analytics 4

Tools and workflow: Git and GitHub, Jupyter, VS Code, JIRA, Microsoft 365

EXPERIENCE

Junior Customer Insights Analyst

2020 to 2022

KeyGap Software Solutions · Bangalore, India

- Produced customer behaviour and campaign performance reports for product and marketing managers across two SaaS clients.
- Wrote SQL queries for weekly active user, retention, and conversion metrics, and refreshed Tableau dashboards used in fortnightly reviews.
- Built a recurring KPI report covering acquisition, activation, retention, and revenue that replaced a manual spreadsheet.
- Supported A/B test reporting for landing pages and email campaigns, and collaborated with developers and product owners in JIRA.

Product Back Office Executive

2018 to 2020

PowerWeave Software Solutions · Mumbai, India

- Managed end to end product listings and catalogue updates for a US based wholesale platform using large Excel datasets.
- Handled order processing, shipping coordination, and quotation workflows, and tightened recurring data entry steps to reduce errors and turnaround time.
- Acted as a regular point of contact for trade partners, contributing to improved partner satisfaction.

SELECTED PROJECTS

- Domain-adaptive sentiment analysis (Data Engineer):** owned the data pipeline (cleaning, standardisation, train and test splits) for a team BERT and FinBERT system across GoEmotions and the Financial PhraseBank.
- Australian beach and water locations (COS60008):** cleaned and analysed Australian open datasets on beaches, amenities, and regional climate in Python and Jupyter.
- Bank loan portfolio dashboard:** KPIs in MS SQL Server (CTEs, window functions) with three interactive Tableau dashboards, cross validated against SQL.

- **Electric vehicle population analysis:** Python EDA and an interactive Tableau dashboard on EV adoption.
